

MATERIAL SAFETY DATA SHEET (MSDS). This is an exact copy of the sheet posted on the Brazilian Blowout website.

1. IDENTIFICATION OF THE PRODUCTS AND THE COMPANY

Trade name of the products: Anti Frizz Straightening – Cacau Solution; Anti Frizz Straightening – Açaí Solution

GIB, Inc dba, Brazilian Blowout

Telephone: 877.779.7706 Fax: 818.623.2309

2. COMPOSITION AND INFORMATION ABOUT THE INGREDIENTS:

PREPARATION: Mixture

CHEMICAL NATURE: Anti Frizz and Hair Moisturizers.

INGREDIENTS OR IMPURITIES WHICH CAN OFFER DANGER: None

3. HAZARDS IDENTIFICATION:

CRITICAL DANGER WARNING: None

HUMAN HEALTH: None

ENVIRONMENTALS: The product is water-soluble and possesses detergent action.

PHYSICAL-CHEMICAL **Not classified as a dangerous product**

SPECIFIC HAZARDS: Not classified as a dangerous product.

CLASSIFICATION OF THE CHEMICAL PRODUCT: Not classified as a hazardous product.

EMERGENCY OVERVIEW: Product of low toxicity

4. FIRST AID MEASURES

INHALATION: None

CONTACT WITH THE SKIN: None

CONTACT WITH THE EYES: Wash with abundant water, maintaining the eye lids open.

Remove contact lenses and if the irritation persists, consult an ophthalmologist.

INGESTION: Remove any remains from your mouth. Rinse your mouth with fresh water Vomiting should not be induced. Drink slowly, large quantities of water or milk, after this, ingest a spoon of edible oil and request medical attendance.

5. FIRE FIGHTING MEASURES:

FIREMEN PROTECTION: Use adequate breathing equipment when fighting fires involving this product.

6. CONTROL MEASURES FOR SPILLS OR LEAKAGES

PERSONAL PRECAUTIONS: Avoid contact with eyes and mucosa

PRECAUTIONS TO BE TAKEN REGARDING THE ENVIRONMENT: Spills or uncontrolled discharges

into water courses must be reported to the authorities in charge.

CLEANING METHOD: Recovery: If possible, collect the spilled product and transfer it to container that is properly identified.

Disposal: Dispose of the products in a place that is appropriate for such cases according to the law in force.

Prevention of secondary hazards: None

7. HANDLING AND STORAGE

HANDLING

Technical Measures: Prevention of the exposure of the worker: Gloves, mask and safety glasses.

Prevention of fire and explosion: Avoid high temperatures

Precautions for safe handling: Avoid contact with eyes as well as ingestion.

STORAGE:

Appropriate Technical Measures: Keep the product in its original package Avoid extreme temperatures and sources of heat.

Safe material for packaging:

Recommended: Polyethylene, PVC, glass is inadequate Wood and paper

8. CONTROL OF EXPOSURE AND PERSONAL PROTECTION

Engineering control measures: No specific monitoring is necessary.

Parameters of specific controls Not applicable

Occupational exposure limits: Not applicable

Other limits and values: Not considered

Adequate equipment for individual protection: Use rubber gloves and safety glasses.

9. STABILITY AND REACTIVITY

Specific Conditions: Under the conditions of normal storage, the product is stable.

Conditions to be avoided: High Temperatures: No risk of dangerous decomposition.

There is no risk of dangerous decomposition.

10. TOXICOLOGICAL INFORMATION

Information in accordance with the process of exposure:

Local effects: May cause mild irritation to the eyes.

Awareness: If ingested can cause diarrhea and nausea.

Toxicological synergistic effects: None

Specific Effects: None

Assessment: Product

11. ENVIRONMENTAL INFORMATION:

Environmental effects, behavior and impacts of the product:

It is a water-soluble, non-cumulative biodegradable organic compound product.

Biodegradability:

Environmental Impact: In contact with water (rivers and lakes), consumes oxygen in

biodegradation. Some of the products mentioned such as shampoo, can alter the physical characteristics

of water due to detergent power.

12. CONSIDERATIONS REGARDING THE TREATMENT AND DISPOSAL:

Treatment Method and Disposal:

Product: Degradation, thermal decomposition or industrial landfill, as established by the

Law. Product Remains: Can be disposed of in industrial landfills after the approval of the competent environmental agencies.

13. Information on transportation. Additional regulations:

Not classified as a dangerous product

14. REGULATION

Product Registered in ANVISA / MS Res, ANVISA n° 343105 Aut. Func.: 202832-4

information on risks and safety as written on the label: Keep in a cool place, away from light and the reach of children.

Handle and apply only in accordance with the recommendations

OTHER INFORMATION

The aforementioned beauty products were manufactured to be used on the hair, according to the indication, First Degree products.

Chemical Technician in charge.
